

Adams Rite Aerospace

INFORMATION RELEASE

Dubai, 30th October 2017

Adams Rite Aerospace (ARA) and MSI Aircraft Maintenance Services International (MSI) are pleased to announce the additional repair capability at their Dubai facility to support the A380 Lavatory Water System.

These additional components complement the existing capability in the Dubai facility to support the ARA water systems in the Middle East Region.

MSI is an Adams Rite Aerospace Authorized Repair Station providing repair and support services for the Former Franke-Aquarotter Water System components for the A320, A3330/A340 and A380 aircraft.

“Having been selected by Adams Rite as the Middle East support facility we are pleased to add this additional capability to provide enhanced support to our customers in the region”, said Mr. Tim Tartsch, General Manager MSI Aircraft Maintenance Services International.

Adams Rite Aerospace is located in Fullerton, CA U.S.A. and designs and manufactures Custom Engineered products for leading aircraft OEM's and Integrators. Products include Cockpit Security Systems, Water Systems and Components, Electro-Mechanical components for the Cabin Interior.

MSI is located in Russelsheim, Germany and Dubai, U.A.E. and provides MRO support and services for a multiple range of products including Engine & related Components, Water Systems, Electronics and Survival Equipment.
